NEWS LETTER

Dear Members of Indian Academy of Neurology,

Greetings from the IAN Secretariat !

Next year, Indian Academy of Neurology will be completing two decades of excellence. It is an important milestone and we should celebrate it appropriately. Next year onwards IANCON will be for four days. It is a time for change.. time for value additions ..time for making it more attractive, educative and informative.. time for moving ahead with great enthusiasm and commitment. Your suggestions are extremely valuable to enhance the vision and mission of Academy.

The Eighteenth annual conference of IAN will be held at Trichy from Sept.24 to 26, 2010. Scientific committee under the chairmanship of IAN president Prof. K. Radhakrishnan has planned an excellent academic program for this conference. Prof Stefan Pulst, Prof .Rammohan Kottil and Prof S H Subramony, all from USA will be the guest faculty for the conference. Delegates will have great opportunity to interact with the guest faculty and our own stalwarts. The response to the conference has been more than expected. We received 172 abstracts, out of which 146 were accepted for presentation. The detailed scientific program is available on our website www.ianindia.com

"Small is beautiful". It can be said about Trichy. Organizing Secretary Dr. M. A. Aleem and his team are making their best efforts to make the conference a memorable event. I am sure you will be moved by the hospitality and personal touch. You will also enjoy the heritage sites in and around Trichy.

Though the life membership of IAN is increasing every year, there are still many Neurologists in the country who should be roped in the fold of IAN. Please encourage and motivate your colleagues, friends and students to become members of IAN.

As always, I value your suggestions.

I wish the Academy a great future.

Sincerely yours,

Dr. Chandrashekhhar Meshram
Honorary Secretary-IAN
